

#### **European Working Conditions Survey**

6<sup>th</sup> EWCS: First findings

Changing working conditions in Europe: Moving towards better work

**24 November 2015** 

Agnès Parent-Thirion
Senior programme manager

#### 6th EWCS: Context

Sixth edition - 1991, 1995, 2000, 2005, 2010, 2015

From 12 MS in 1991 to 35 European countries in 2015

Cooperation with South Korea, US, China with support of ILO

'Face to face' interviews: 45 minutes

Questionnaire revised - input from tripartite stakeholders and users

35,765 interviews in EU 28 between February and September 2015

**Comparability is key** 

#### 6th EWCS: Objectives

Assess and quantify working conditions of **employees and self-employed** across Europe on a harmonised basis

Analyse relationships between different aspects of working conditions

Identify groups at risk and issues of concern and progress

Monitor trends by providing homogeneous indicators

Contribute to European policy development - in particular on quality of work and employment issues

#### 6th EWCS: Place of work

Work as an activity

- Means to an end
- A product

Work and its quality

- High-level political concern
- Important activity for workers and households
- For companies and their representatives
- For governments and societies at large

Quality of work and employment (and job quality)

- Result of behaviours at micro level workers, companies
- Embedded in different labour markets and institutional contexts
- Affected by many determinants

#### 6<sup>th</sup> EWCS: First findings

Changes in working conditions and population at work

A first set of indicators

**CAUTION!** 

#### 6th EWCS: First findings

## People at work

- Gender differences remain important
- Both in and outside work
- Working conditions vary with age

#### 6th EWCS: First findings

### Job quality

- Same job insecurity, employment insecurity down
- More <u>career prospects</u>
- Physical risks remain, some positive developments
- 15% subject to <u>adverse social behaviour</u>
- Working time not (always) individual preference
- Increase in <u>autonomy</u> over time
- Mutiple evidence of gender segregation
- Employment status makes a difference
- Differences in job quality by occupation
- Working conditions <u>combine</u> in different ways
- Sharp drop in feeling of work always well done

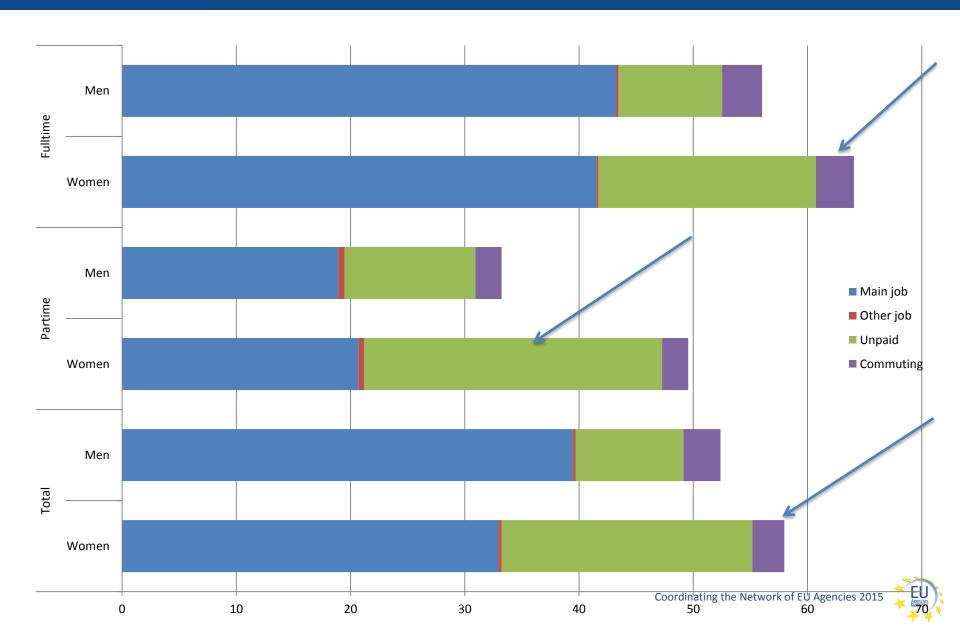

#### 6th EWCS: First findings

# **Company** practices

- High level of information on <u>health and safety</u> risks, differences according to company size
- High level of <u>social support</u> by colleagues (71% all the time) and managers (58%)
- 31% of employees work in a <u>high involvement</u> organisation ( high task discretion and high organisational participation)
- 63% report the organisation they work for motivates them to give their best job performance

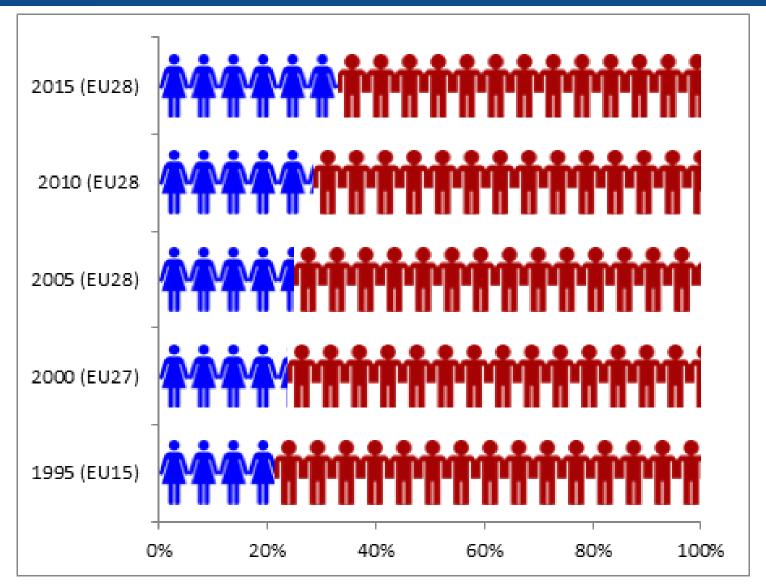

#### 6th EWCS: Time use

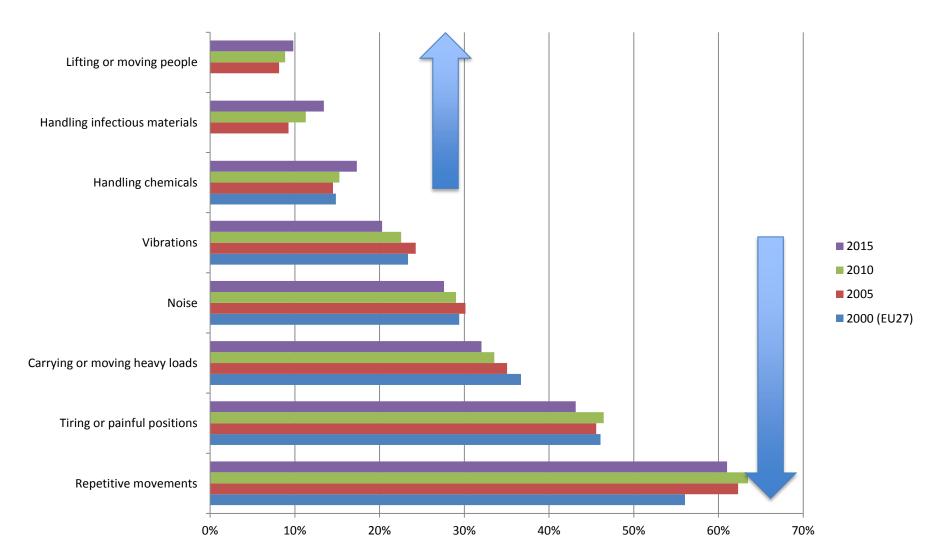

#### 6th EWCS: Women managers

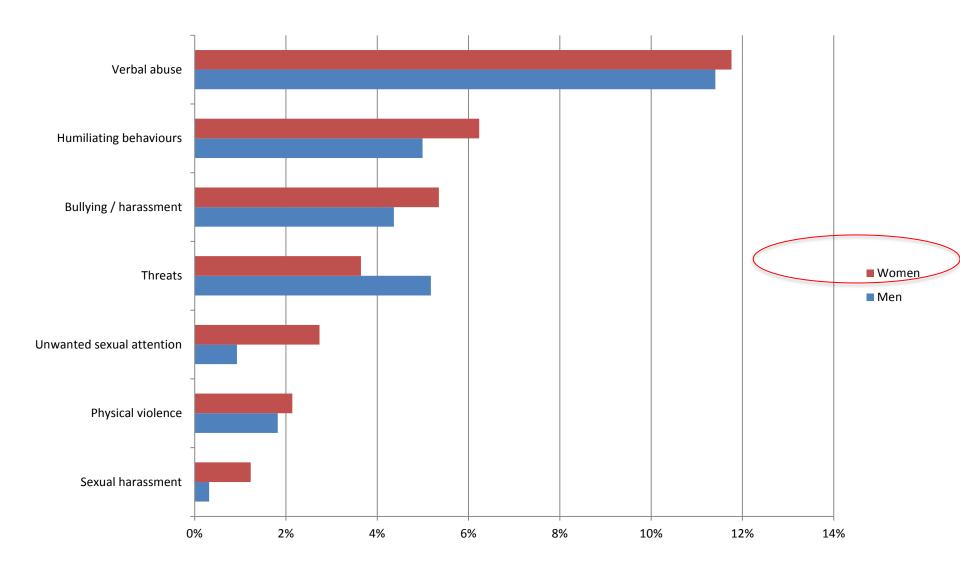

#### 6th EWCS: Physical risks

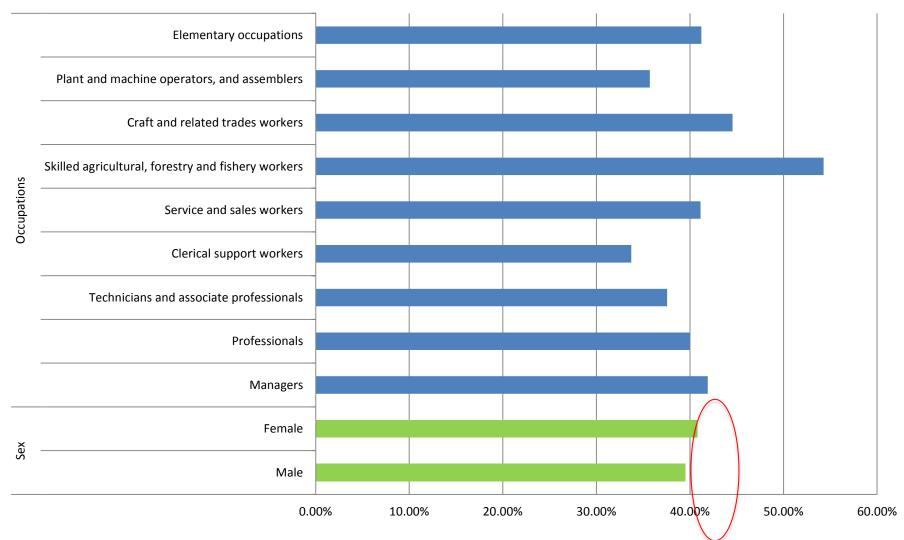

#### 6th EWCS: Violence at work

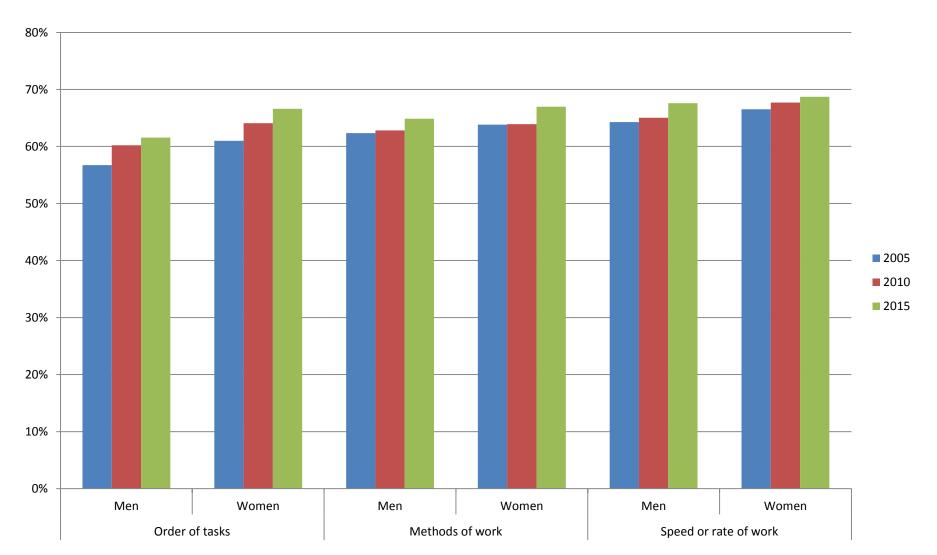

#### 6th EWCS: Work well done

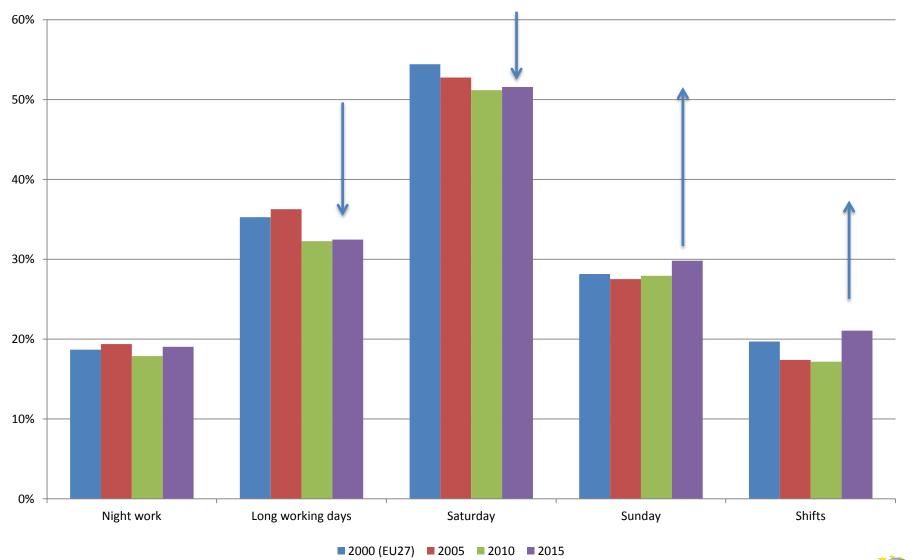

#### 6th EWCS: Job autonomy

#### 6th EWCS: Working time

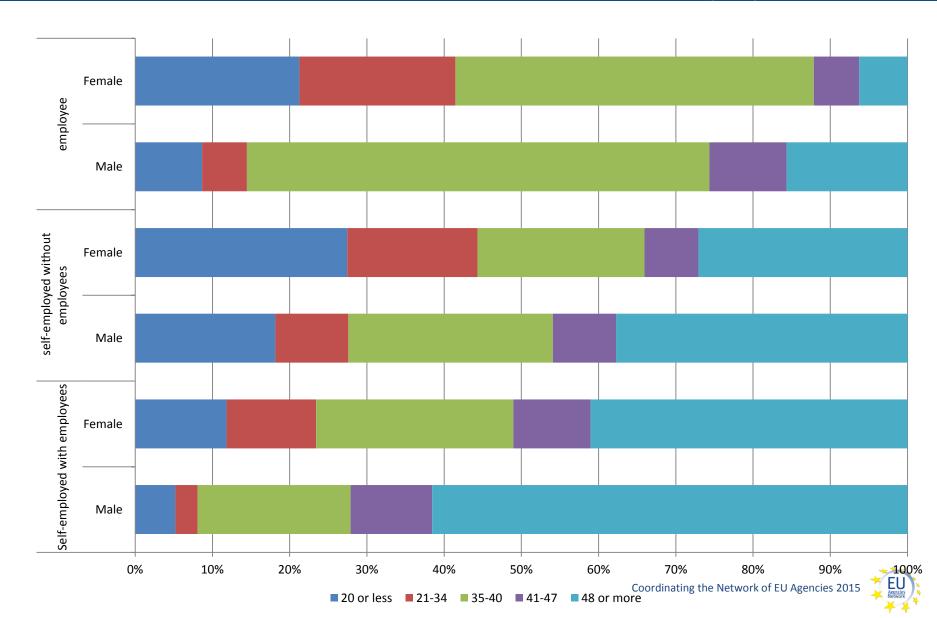

(Atypical)

#### 6th EWCS: Working time

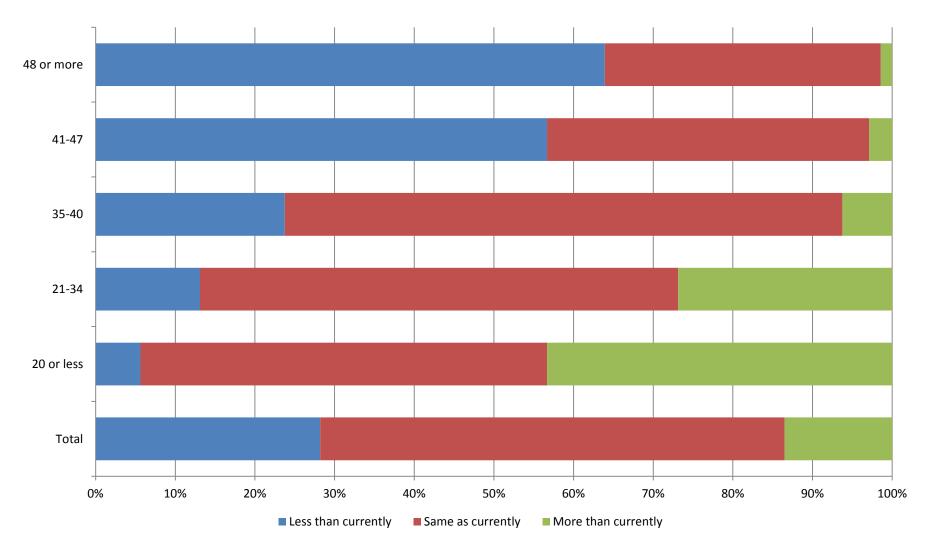

(employment status)

#### 6th EWCS: Working time

(preferences)

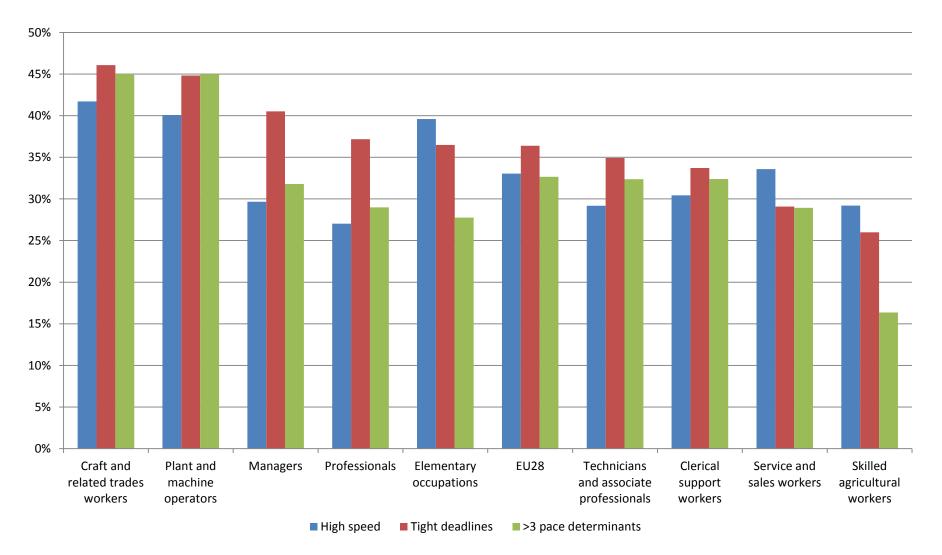

#### 6th EWCS: Changes in job

(in last 12 months)

|                                    | Increase | No change | Decrease |
|------------------------------------|----------|-----------|----------|
| Number of working hours per week   | 21       | 72        | 7        |
| Your salary or income              | 32       | 58        | 11       |
| Amount of influence over your work | 22       | 74        | 4        |
| Your tasks and duties              | 34       | 63        | 3        |

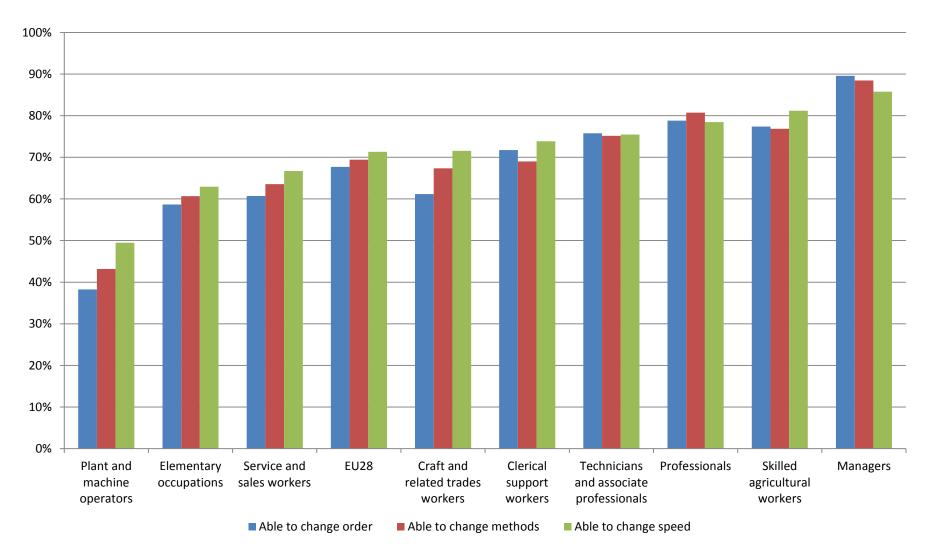

## Eurofound 6th EWCS: Intense work, occupations

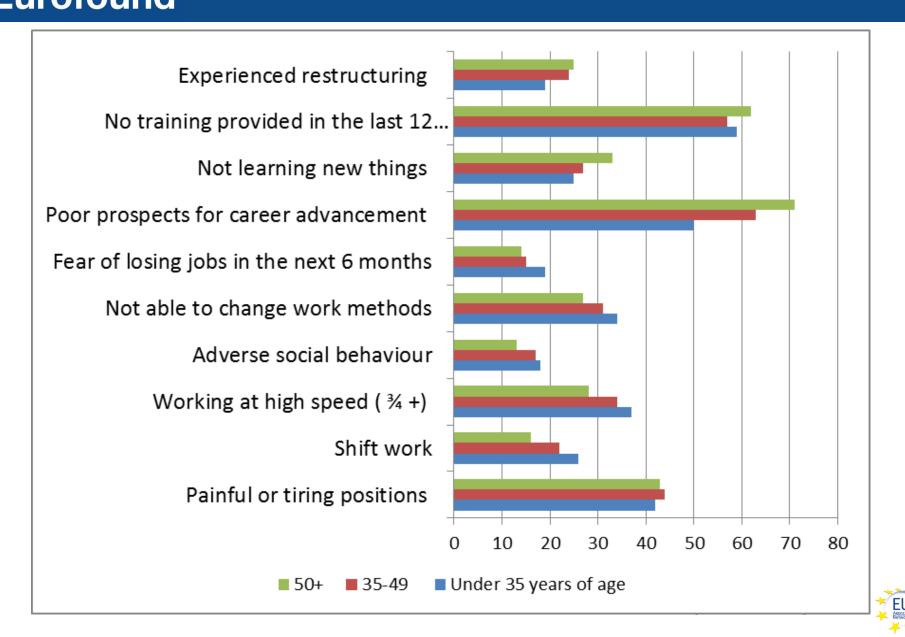

#### 6th EWCS: Autonomy, occupations

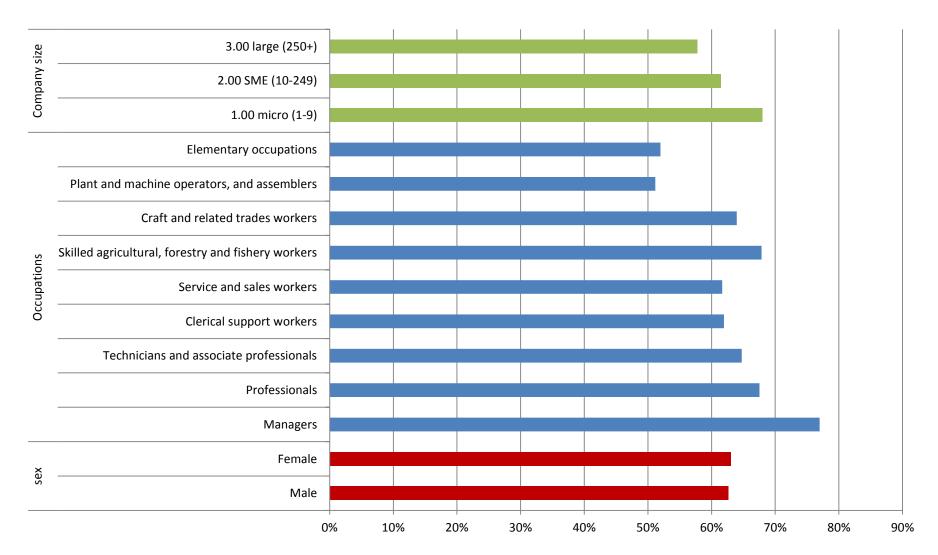

## Eurofound 6th EWCS: Working conditions, age

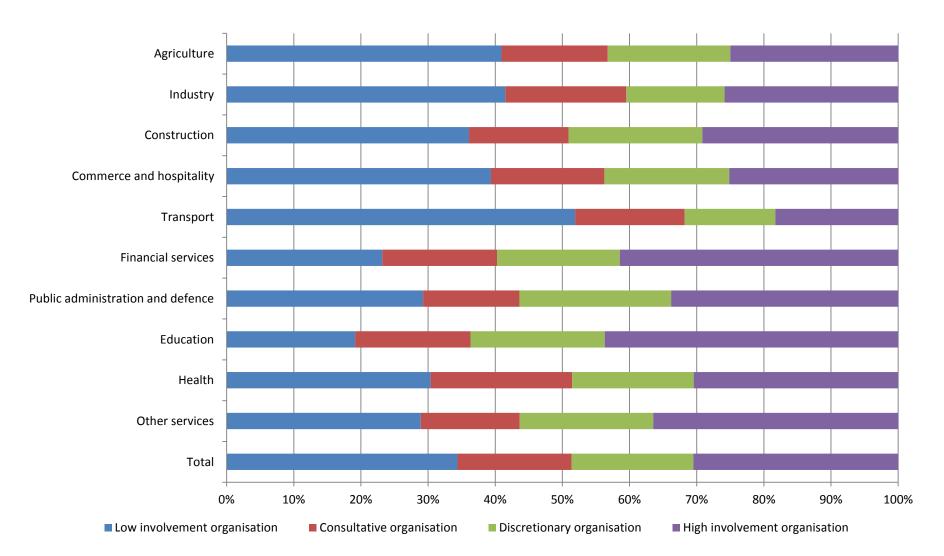

#### 6th EWCS: Motivation

#### 6th EWCS: Organisation participation

#### 6th EWCS: Policy perspectives

**Richness and diversity of working lives** confirmed: many work situations reflect positive and negative features, 'traditional' issues, inequalities at work, emerging developments and changes

Labour markets and social policies closely linked - also to economic policies more generally

**Improvement of working conditions not automatic** - requires support - many improvements do not cost money

Good working conditions can assist in meeting the ageing challenge and developing our human capital

**Lifetime perspective crucial** in successful development of labour market, social and economic policies in pursuit of higher levels of employment

Surveys, statistics needed to monitor developments, understand changes. Should build on interdisciplinary approach, involve data user

#### Merci
